

## Feedback from GenAI - Utkarsh Bajaj

This is what I worked on after feedback from the GenAI model

1. It mentions that the historical data opportunity calculator does not mention how the data is stored, but in our documentation it was clearly stated that an external system, i.e. the database will store it, so that was sort of a wrong feedback.
2. Improve the lack of definition for some workflows: like the identified traded currencies and store information workflow
